

Haykel Premium Health Package

An evaluation tailored to your needs: Your Haykel Premium Health Package will be customized to meet your needs based on your risk factors, family history, gender, age and personal choices. All of these will be determined through a personal filling of a one-minute online questionnaire in advance of your visit.

Based on the information obtained from your answers, you will have access to your personalized preliminary HPHP. During your visit, you will be examined by an internist physician in order to get your optimal health package. If needed, it will be arranged for you to meet with specific medical specialists, nutritionists, exercise physiologists and other experts. You will have access to a head to toe physical examination followed by laboratory and genetic tests as well as clinical and radiological exams to monitor and assess your risk for developing heart problems, head stroke, cancer screening, rheumatismal conditions ...

At the end of your visit, your doctor will explain your available test results, and discuss recommendations to optimize your health and wellness. Haykel hospital gives you as well an access to MyHealth, an online service that allows you to check all of your test results. Should any urgent issue be identified during your visit, you will have priority access to the appropriate specialist for further evaluation during an in-depth assessment that will be scheduled at your convenience.

Take control of your life ...

Staying in good health is your key to a happy and successful life; but it remains the most neglected asset. Our lifestyle nowadays is full of stress, long and irregular work hours, bad eating habits and inadequate rest. All these coupled with high pollution levels will result sooner or later in physical problems.

People tend to ignore their health until faced with medical issues, but health problems can be managed more efficiently if detected at an early stage. This is where Haykel hospital comes in the picture to help you with its Haykel Premium Health Package (HPHP).

This checkup is focused to screen all the body functions in a **one day convenient and luxurious experience.**
