

The First Italian - Lebanese Science Day in AUB

After 12 fruitful years of cooperation between the University of Palermo in Italy and the American University of Beirut (AUB), the first Italian-Lebanese Science Day was celebrated on April 12, 2019 at the Issam Fares Hall in AUB, in partnership with the Lebanese Association for the Advancement of Science (LAAS), the National Council for Scientific Research-Lebanon (CNRS-L) and the collaboration of the University of Palermo.

Over the years, the valuable cooperation between the University of Palermo and the American University of Beirut has produced around 30 scientific articles and exchanges for teachers and students. Five Lebanese students continued their doctoral studies at the University of Palermo in international research, especially in biomedical and neurological sciences. The next objective is to establish a joint course to obtain a double diploma from the two universities.

Dr. Khouri and Dr. Micari signing the Memorandum of Agreement in the presence of Dr. Jurjus and His Excellency Mr. Marotti.

The opening ceremony.

The ceremony was marked by an official signing of the Memorandum of Agreement between the Universities, signed by the President of the University of Palermo, Dr. Fabrizio Micari, the President of the American University of Beirut, Dr. Fadlou khouri, and the presence of his Excellency the Italian Ambassador in Lebanon Mr. Massimo Marotti.

More than 300 students and academic teachers attended the event and researchers from almost all universities in Lebanon participated in this science day.
