

The Gerflor Group

The Gerflor Group was formed in the 1990s through the merger of pioneering companies and brands in the field of floor coverings:

- Gerland Sols, flooring supplier for building and residential applications
- Taraflex, world leader in sports floors (Olympic Games supplier since 1976) and flooring for transport vehicles and building applications.
- Mipolam, inventor of homogeneous flooring for building and industry applications

The group adopted a single brand, Gerflor, in 2000.

Gerflor supplies flooring to professional markets, with product ranges designed for the Building, Sports, Transport Vehicles and Residential sectors and collections that reflect current Home Fashion trends.

The brand can be found in homes, transport vehicles, schools, hospitals, stores, sports arenas, restaurants, hotels, etc., making it a part of our day-to-day lives.

World leader in the Healthcare sector by offering solutions in line with the disinfection and hygiene requirements of healthcare establishments: floors with surface treatments that can withstand even the most stubborn stains and ensure hygiene and easy maintenance.

Within healthcare, floorings must meet the needs of healthcare and administrative employees, patients and visitors. Furthermore they need to be long lasting and adapted to the use, they also need to be comfortable and bring a quiet atmosphere to help patient's recovery and relaxation for the elderly.

Gerflor has created solutions handling these constraints, while still enabling customers to customize each area with a wide variety of designs and colors. Concerned about delivering hygiene and disinfection solutions, Gerflor floors have stain resistant surface treatments enabling easy cleaning and guaranteed hygiene.

As a responsible company, Gerflor strikes a balance between growth and sustainable development, with a focus on:

- **Recycling:** Recycle as many of our installed products as possible and incorporate them into new products
Gerflor products = 100% recyclable
70% of the market = renovation => installation offcuts (10-15% of a job) and end-of-life product replacement => Gerflor's responsibility to reuse them => 40,000 m2 of flooring recycled for the London Olympic Games and incorporated into our sports floor coverings
Installation offcut recycling program with our partner installation contractors (win/win: recycling costs less than the €100/t cost of landfill disposal): Ex: 80,000 m2 Chambery Hospital
- **Indoor air quality:** People spend 80% of their time indoors => importance of preserving indoor air quality
Products rated A+ (French health safety labelling for

construction materials under the Grenelle environmental law)
VOC below detection levels, particularly for schools and hospitals
Named the world's greenest school flooring supplier in Hong Kong
Adhesive-free installation solutions Creation Clic, Texline, GTI, to name a few
Gerflor offers more than just floors, but a complete floor/wall/wall protection and handrail (Gerflor Group's SPM company) solution, as well as a range of Romus finishing accessories for perfect finishes (entrance mats, tools, skirtings, etc.).

VitalAire: Home Care Services Provider

VitalAire: Who we are?

Providing medical gases and equipments without interruption for many years, and during the most difficult internal events, in Lebanon and times of invasion, VitalAire has built a solid reputation as a reliable partner and available to all patients and healthcare professionals. This was largely achieved through a team of dedicated and passionate individuals and by adopting a culture of customer service so advanced and well entrenched in its daily activity.

Our Teams:

We train and accredit our multi-disciplinary teams to continually adapt to the latest professional requirements; we commit everyday alongside patients and caregivers to:

- Coordinate the return home of hospitalized patients, in collaboration with their healthcare professionals.
- Implement the home treatment of patients, in compliance with medical recommendations from the healthcare
- Provide constant patient follow-up throughout the duration of the treatment.
- Facilitate their travelling through our international network of branches.

Our Know How!

We provide support tools to enhance patient education and motivation, informative programs for healthcare professionals and secure patient records and web portals for prescribers.

Patient & Team Safety:

- 24/7 call and coordination support.
- Full local logistics involving VitalAire technicians at patients' home.
- Patient education on proper use of their medical devices.
